

## SECURE HOSTED REVIEW SOLUTIONS

Elite Discovery employs only the premier eDiscovery platforms available today. We look at your long-term litigation strategy, current case objectives, and specific technical needs to determine the eDiscovery hosting and review platform that works for you.

As data volumes continue to increase exponentially, efficient eDiscovery ensures that key evidence isn't overlooked in the legal process. **Everlaw** enables legal teams to discover, reveal, & act on all the information relevant to a case in a secure, centralized location.

The **Viewpoint™** all-in-one eDiscovery hosting and review platform brings simplicity, ease, and affordability to your legal and compliance projects by enabling you to manage all processes, apply advanced analytics and utilize predictive coding without extra cost or tools.

The platform offers a user-controlled experience for upload, review, and production. **CloudNine** Review delivers high service levels with all the features and functionality you need, and nothing you don't.

Used for every type of case from litigation management to internal investigations and responding to government requests, **Relativity** reduces your risk and helps control costs associated with identifying, collecting, and analyzing electronic information.
